## STRATEGY, LP

### ABOUT THE CRYPTOCURRENCY ESG STRATEGY

The CRYPTOCURRENCY ESG STRATEGY, LP is comprised of investments in environmental, social or governance qualified blockchain-based digital assets. Projects of all sizes may be considered for investment provided that the project meets the portfolio's ESG mandate by either seeking to protect civil rights, reduce corruption, expand financial inclusion, reduce censorship, promote liberty, improve health services, foster scientific discovery, protect the environment, benefit low income communities or seeks to otherwise serve the public good as a core part of its corporate mission.

### ABOUT THE FIRM

Sarson Funds is an independent provider of blockchain technology and cryptocurrency investments and educational services focusing on the financial professional community and their clients. In collaboration with our investment manager partners, Sarson Funds seeks to bring Wall Street standards for research, risk management and transparency to digital asset investing.

### TRADING ADVISOR

Sarson Funds Investment Management, LLC-S Series ESG Strategy, an Indiana limited liability company, serves as the Partnership's Trading Advisor and maintains a Fiduciary Standard while managing Partnership capital. Sarson Funds, Inc supports the Trading Advisor through technical and administrative expertise, as well as market research.

### WHY THE CRYPTOCURRENCY ESG STRATEGY?

#### DIVERSIFICATION

The partnership's assets are allocated across a diverse range of 10 to 30 cryptocurrencies, chosen by the Trading Advisor for meeting the partnership's investment criteria and potential for price appreciation.

#### METHODOLOGY

In normal conditions, 100% of the Partnership's portfolio will be allocated to cryptocurrency investments. The Partnership does not use leverage or maintain short positions.

#### SECURITY

The Partnership seeks to manage risk through the use of third-party audits, position size limits, counterparty diversification and through the use of an independent administrator.

### EXAMPLES OF ESG ORIENTED PROJECTS IN BLOCKCHAIN

Helium: Decentralized IOT & 5G Network supporting agricultural monitoring and 5G plans at a fraction of the cost

Ocean: Employing its Compute-to-Data technology, the protocol enables privacy-preserving data analysis, which can drive significant environmental and health improvements without compromising data security

Hivemapper: Decentralized global mapping network that rewards its contributors for collecting 4K street-level imagery with dashcams

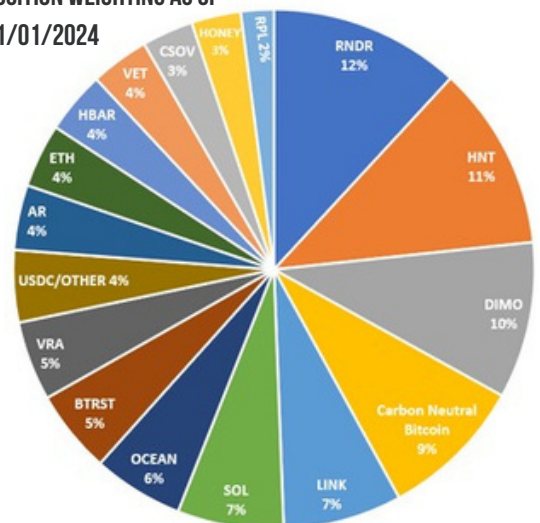

Arweave: Creating an on-chain permanent storage solution with a focus of anti-censorship and decentralization

Render Network: A decentralized network of GPUs enabling affordable and distributed computing power for various applications, revolutionizing industries through enhanced computational capabilities

**PORTFOLIO ELIGIBILITY CRITERIA:** THE FOLLOWING CATEGORIES ARE CONSIDERED FOR DETERMINING CONSTITUENT ELIGIBILITY

**Public Goods:** Non-excludable, non-rivalrous utilities and services that provide benefit to the public.

**Scaling and Interoperability:** Protocols implemented to improve the feature set of high-traffic Layer 1 networks, enabling fee reduction, energy cost/tax reduction, or higher throughput computing environments.

**Environmentally Sustainable Consensus Models:** Networks using Proof-of-Stake models, or similarly energy efficient consensus models. In cases of Proof-of-Work consensus, constituents will only be included on the basis of provably sustainable energy sources.

**Social Impact:** Constituents that demonstrate a disintermediation of centralized bodies, which drive current or potential positive effects for people and communities.

**Financial Inclusion:** Constituents that expand the reach of modern capital markets through permissionless and decentralized delivery of financial goods and services.
